Hi, my name is Tony Verbsky of

A+ Home Inspection and I have been inspecting homes for 3 years and have been involved in the home building industry for over 35 years. I trained for over a year with **InterNACHI** learning the trade of home inspection and continue to train earning advanced credentials in multiple area of home inspection. Please visit my website for a complete list of my certifications and trainings.

I am currently offering, with every paid home inspection, **free interior thermal image scans** of the interior of your future home to help protect you from moisture intrusion, mold, and heating and air inefficiencies.

I am a certified, insured and licensed drone pilot. I have the ability to thermal image the exterior of your home from the ground and from the air. I have the ability to do roof inspections from the ground when it is too dangerous to walk the roof. I can film your property when you are in need of an alternative view or just think it would be cool to have an aerial view. Note: I can only offer this in non-restricted areas.

Note: square feet = sq ft = Livable+Unfinished

A+ Home Inspection 2018 Prices	Price
Condo with no roof or grounds to inspect	\$275
Condo with roof and grounds to inspect	\$300
Home under 1500 sq ft	\$300
